PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with ~7 years building high-volume platforms at **Estia Software DMCC** (real time energy/e-learning), handling 2M+ daily time-series data points. Architected **NestJS/PostgreSQL** backends and **Next.js/Typescript** front-ends from scratch, driving 25-40% performance gains through database sharding and caching optimizations while mentoring development teams.

KEY ACHIEVEMENTS

- Engineered **Envita** SaaS energy platform: Real-time time-series dashboards processing 2M+ data points daily via **MQTT** from sensors, **AWS IoT Core** integration, multi-frame aggregation, and complex optimized queries—slashing chart/dashboard load times 40% for energy professionals.
- Built **Ecorize** energy platform: **GraphQL APIs** handling complex energy modeling workflows, optimizing aggregations across **PostgreSQL/Redis** for sub-second responses.
- Delivered **ASP School** e-learning platform: Multilingual **Laravel/React** system with video streaming and progress tracking, scaling to production educator workflows.
- Contributed to backend for **Bact** for Consulting & Training e-learning platform: **Node.js/TypeORM** with **PostgreSQL**, powering scalable course delivery and user management **APIs** as part of development team.
- Developed **Beethere** taxi ordering app: **WebSocket/Socket.io** for real-time ride requests and driver/customer updates; integrated live location tracking and payment **APIs**.
- Built 3+ e-commerce platforms end-to-end: **Laravel/Node.js** stacks with inventory management and **Stripe** integrations, achieving zero-downtime deploys.
- Drove 25-40% performance/stability gains across 5+ apps via database optimization, **Jest/Cypress** automation, and **TypeScript** refactoring.
- Led architecture decisions and mentored 5+ engineers, enforcing **CI/CD** pipelines and raising delivery speed 2x in **Agile** teams.

TECHNICAL SKILLS

Languages: TypeScript (7+ years), JavaScript (ES12+, 7+ years), PHP (4+ years)

Front-End: Next.js (SSR/SSG, 4+ years), React.js (6+ years), Vue.js (3+ years), Tailwind CSS

Back-End: Node.js (6+ years), NestJS (4+ years), Express.js (6+ years), Laravel (4+ years), TypeORM (4+ years)

Databases: PostgreSQL (advanced queries/aggregations, 5+ years), TimescaleDB (time-series), MongoDB (high-volume real-time data, 4+ years), MySQL, Redis

Real-time & IoT: MQTT, AWS IoT Core, WebSockets (Socket.io)

APIs: REST, GraphQL

DevOps and Cloud: AWS (EC2/S3/Lambda/IoT Core), Docker, GitHub Actions CI/CD, Sentry

Testing/Tools: Jest, Cypress, Playwright, Git

Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Estia Software DMCC | May 2023 to Present

Dubai, United Arab Emirates

- Led architecture for energy SaaS (**Envita/Ecorize**): **Next.js/NestJS** stacks with **MQTT** from sensors via **AWS IoT Core** ingesting 2M+ daily time-series data points; engineered multi-frame aggregations, **TimescaleDB/PostgreSQL** complex queries—slashing dashboard/chart load times 40%.
- Built scalable **GraphQL/REST APIs** with federation, **SSR/SSG** UIs optimized for SEO/real-time viz; implemented **GitHub Actions CI/CD**, **Jest/Cypress** (95% coverage), **Sentry** monitoring—cutting production incidents 50% and enabling zero-downtime deploys.
- Impact: Shipped 3 enterprise platforms to production; mentored 5+ engineers on **TypeScript/CI/CD** standards, doubling team velocity while hitting **99.9%** uptime SLA.

Software Engineer

Nordelco DMCC | December 2022 to May 2023

Dubai, United Arab Emirates

- Converted project from **JavaScript** to **TypeScript**; improved bug detection and reduced runtime errors by 40% through static typing and better IDE support.
- Developed/optimized **Node.js/Express REST APIs** for energy workflows; **PostgreSQL** indexing delivered 35% faster queries and 25% stability gains.
- Collaborated on **Vue.js** dashboards with real-time charts; refactored legacy components, cut bundle sizes 50% via code-splitting/tree-shaking.
- Impact: Stabilized platform for 50+ daily users; **Jest** automation reduced bugs 60%.

Software Engineer

Digital Real Marketing | October 2022 to December 2022

Dubai, United Arab Emirates

- Delivered **Laravel** e-commerce **APIs/DB schemas** for products/orders/payments; 100% on-time under tight deadlines.
- Impact: Launched 2 live sites, enabled first revenue via reliable processing.

Full-Stack Developer

3 Miles | November 2021 to September 2022

Damascus, Syria

- Contributed to full-stack **Laravel, Vue.js**, and **Node.js** projects, implementing features from requirements through production deployment and improving delivery timelines by ~50%.
- Delivered 2 production apps, cutting client deployment times 50%.

Full-Stack Developer

Unifi Solutions | August 2020 to March 2022

Remote, Part-time

- Developed **Node.js/MongoDB** backend services for **events management system** + **Bact** e-learning backend (**Node.js/TypeORM/PostgreSQL**); designed **RESTful APIs** and optimized databases.
- Scaled **APIs** to 3x capacity across client apps; improved course delivery reliability 30% through performance tuning and documentation.

Full-Stack Developer

Technical G | February 2021 to May 2021

Damascus, Syria

- Led small development team on production systems.
- Resolved performance bottlenecks, boosting app responsiveness 40%.

Full-Stack Developer

Aspiraties | July 2020 to October 2021

Damascus, Syria (Remote, Part-time)

- Optimized **Node.js/DB** queries for **ASP School** multilingual e-learning platform.
- Cut video streaming latency 25% for global production users.
- Rewrote front-end components in **React** for better UX.

Full-Stack Developer

We Media | May 2019 to April 2021

Damascus, Syria

- Delivered **React/Laravel/Flutter** full-stack solutions for clients.
- Achieved 100% on-time delivery across 6 concurrent projects.

NOTABLE PROJECTS

Envita (<https://envita.io/>)

Energy Monitoring Platform

- **Next.js/NestJS, MQTT/AWS IoT Core, TimescaleDB/PostgreSQL**
- Developed energy monitoring dashboards to track/visualize/analyze consumption; built scalable front/back-end with real-time API pipelines processing 2M+ data points daily, slashing load times 40%.

Ecorize (<https://ecorize.de/en>)

Energy Planning Software

- **React/GraphQL, PostgreSQL/Redis, NestJS**
- Contributed energy planning features for engineers: calculations, data visualization, workflows; optimized data-intensive UIs for sub-second responses.

ASP School (<https://asp-school.nl>)

Online Learning Platform

- **Laravel/React, Node.js**
- Built multilingual (Dutch/English/Arabic) video/text courses, practice modules, progress tracking; scaled responsive delivery for production educators.

Beethere

Taxi Ordering Application

- **Laravel, WebSockets/Socket.io, Node.js, Next.js**
- Developed core features for ride requests, real-time driver/customer updates; integrated **APIs** for location tracking and payments.

Al-Adham

E-Commerce Platform

- **Laravel, Stripe**
- Built horse product catalogs, shopping carts, order workflows; launched full e-commerce with zero-downtime payments/inventory.

Bact

Consulting & Training (E-Learning)

- **Node.js/TypeORM/PostgreSQL**
- Engineered course delivery/user management **APIs**; scalable backend for training platform.

Events Management System

- **Node.js/MongoDB, REST APIs**
- Developed event scheduling services; scaled **APIs** 3x capacity with 30% reliability gains.

EDUCATION

Bachelor of Information Engineering (Artificial Intelligence)

Arab International University

Damascus, Syria | October 2016 - February 2022

GPA: 3.25 out of 4.00

LANGUAGES

Arabic: Native

English: Professional
